

# make a mouse finger puppet

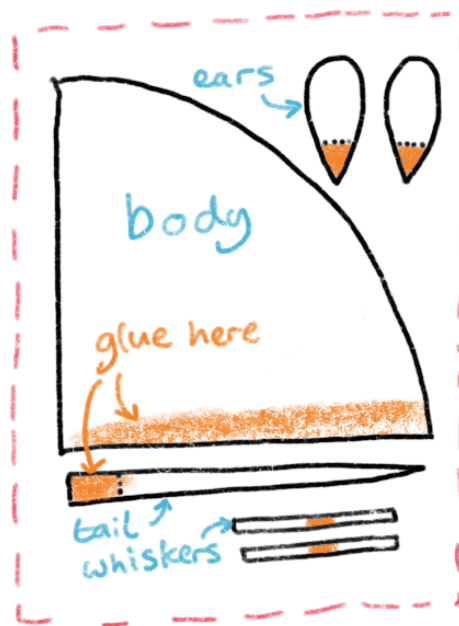

You will need scissors, colouring pencils and glue

Print this sheet at home or draw the shapes on a piece of paper (any colour will do!)

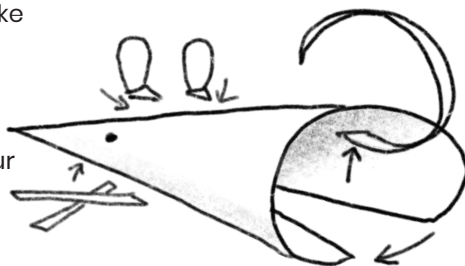

Cut out a big and a small mouse. Make a few and put on one each finger! Give them names and make up a story about them.

where to glue:

- 1 cut out mouse parts (there are parts for 2 mice on this sheet)
- 2 fold on the dotted lines
- 3 bend the body round to make a cone and glue one edge
- 4 glue on the tail, ears and whiskers
- 5 add dots for eyes, and colour the nose and in the ears
- 6 bend the tail round a pencil to make it curl

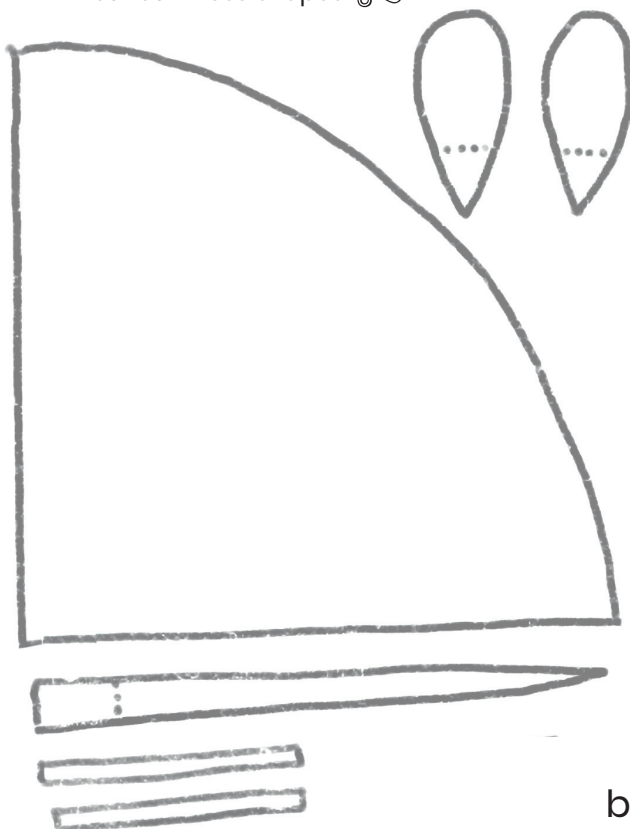

Don't forget to add some ears!  
Sometimes it's easier to add patterns and colour before you cut the items out

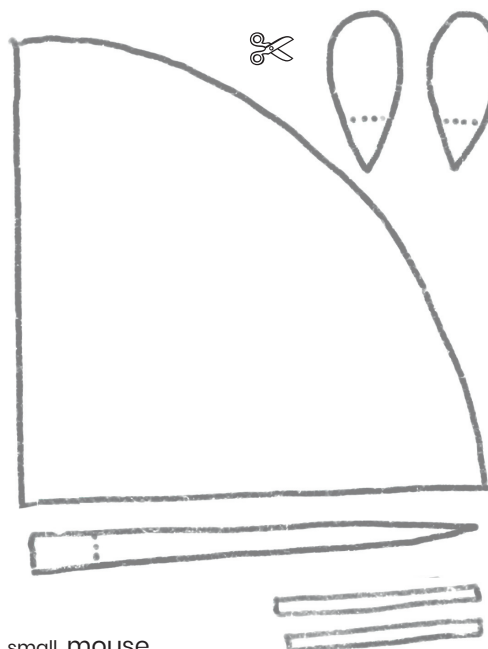

watch a video on making a mouse if you need more help:

cut out these shapes ✂

big mouse

small mouse
